

Gadget Review

Make it large

Take advantage of the fashion for 'big' executive accessories with big buttons. Large buttons with large numbers are easier to read and to use. Large button calculators, telephones, remote controls and computer keyboards are available.

Battery-lighted magnifiers are available for reading. A simple round pocket magnifier is useful, but there are also magnifiers for televisions and computer screens. Some tools for detailed, precise work, such as micro-tip tweezers and pliers, have an adjustable magnifying glass attached. Check out craft-making shops and suppliers.
